

# Case History Metronet Rail

## **Flexibility and Speed of Reaction the Cornerstones of Good Service**

Commencing in November 2005, Adsec Group Ltd continue to provide manned guarding, key holding, rapid response and patrolling solutions for Metronet Rail during major refurbishment programmes to London Underground's network of stations.

Thus far we have provided security solutions to stations and maintenance depots on behalf of Metronet Rail as well as rail contractors including Balfour Beatty, Mansells PLC, Birse Metro and Mace Rail.

Since commencing our first assignment, Hainault Station Depot on the Central line in London's East End, we have provided security cover to over 25 stations and depots during various refurbishment programmes.

Our work has included the ingress and egress of contractors, the control of passenger movements and the delivery and collection of goods and Materials.

All officers employed on these projects have been safety permit trained and have been trained to provide the highest standard of care and control while working on one of the world's largest transport networks.

Metronet Rail have recognised the benefits of employing a company whose flexibility, attention to detail, pro-active ethos and ability to respond quickly to changes in requirement have made us a market leader in the provision of security services to the rail sector.

We are currently providing security guarding at 12 stations and depots which are undergoing refurbishments. With a programme of refurbishment which is expected to last for the next twenty five years, we look forward to a long and mutually advantageous relationship with one of the UK's foremost rail maintenance organisations.

### **TESTIMONIAL FROM METRONET RAIL**

*"I first crossed swords with Advanced in 2006 when I was asked to approve their tender for some guarding work at Hainault LUS. Little did I know then that two years later they would be providing manned guarding services at 15 LU Station refurbishments.*

*They have proven to be one of the most hard working, dedicated and flexible contractors I have worked with. They seem to be able to conjure up a high level of service at very short notice and their staff and management all seem to have the 'can do' attitude."*

*Paul Chard  
Procurement Director  
Metronet*

Metronet Rail is responsible for upgrading, replacing and maintaining two thirds of the London Underground, including trains, stations, signalling, track, tunnels, bridges and other related infrastructure. This is set out in a PPP service contract with London Underground, which retains responsibility for running the Tube, including operating trains and stations, collecting fares and public safety.

Adsec Group Limited provide a variety security services to station refurbishments throughout the network including, manned guarding, mobile patrolling, keyholding and rapid response solutions.
